DETAILED ACTION

Specification

1. The examiner suggests that applicants include the structural formula of the compound of formula (1) in the abstract.

Claim Objections

2. Claim 26 is objected to because of the following informalities: Claim 26 is depend on claim 16, and claim 16 is cancel in preliminary amendment submitted on 06/24/2003. So claim 26 should be cancel also. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 12-15 & 27 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a hydrazide compound of the formulas $R^5CXNHNR^6R^7$, $R^5SO_2NHNR^6R^7$, and $R^5NHCXNHNR^6R^7$ (wherein the R groups and the X group are defined in the claims), does not reasonably provide enablement for hydrazide type compounds. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The claims recite hydrazide group compounds. This encompasses any compound containing a hydrazide group. However, the specification only teaches the use of three-hydrazide group containing compounds. Such a limited disclosure does not support the breadth of the instant claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 12-15 & 27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-8 & 31-34 of copending Application No. 10/103,651. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application overlap the copending application claims and would be obvious thereby.

5. Claims 12-15 & 27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 12-15 & 29 of

compending Application No. 10/103,661. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application overlap the compending application claims and would be obvious thereby.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
